

THE PERRIN & ROWE KITCHEN COLLECTION

“THE WORLD’S FIRST 3 IN 1 TAP, USING
GROUNDBREAKING TECHNOLOGY, THIS
PRODUCT MADE THE INDUSTRY SIT UP
STRAIGHT AND LISTEN ”

DAVID COLE - SALES DIRECTOR - PERRIN & ROWE

FROM HUMBLE BEGINNINGS

AND IT ALL STARTED IN AN OLD GARDEN SHED...

Established in 1978 by Bob Perrin and Greg Rowe, the company started life in a large barn in Bob's back garden in East London, engineering and manufacturing components for other brassware companies.

Early on in the 1980's, Perrin & Rowe obtained a reputation as excellent problem solvers and accomplished engineers, we expanded and acquired our first factory in Rainham, Essex. Now we could really start to develop our own products, not just components for other companies.

The world's first tap containing Triflow Technology was invented and patented in 1991. A three way tap that dispensed hot, cold & filtered water. Quickly becoming an established market leader and within a few years was selling around the globe.

WORKSHOP IN EAST LONDON

LEFT

A WORLD FIRST - BRANDED 'ATRIFLO', THIS WAS THE
GROUNDBREAKING CONCEPT THAT HIT THE MARKET IN 1991

ABOVE

BOB PERRIN WAS A MASTER DRAFTSMAN USING THE LATEST
AUTOCAD COMPUTER SYSTEMS

Having established a reputation for excellence and quality, Bob Perrin & Greg Rowe were now keen to expand their own brand and in 1993, the first Perrin & Rowe kitchen products started to roll out of our factory.

A natural progression of the success achieved within the kitchen industry led us to develop and produce the first range of bathroom brassware in 1995. It was clear that the UK market had been waiting for products such as ours, with timeless, beautifully proportioned designs, considered function and lifelong quality all built in. It also became obvious that other markets desired these qualities and an exclusive distribution deal with Rohl in the US quickly brought Perrin & Rowe fittings to an overseas market craving English tradition and excellence. Australia and New Zealand followed and all these relationships are still going strong today.

ABOVE

SCREWCUTTING WASHER PLATES FOR A CUSTOMER

By the millennium, it was evident that Perrin & Rowe had outgrown their current factory and we moved to a huge 55,000 sqft facility in 2003, enabling us continued growth for years to come. In a few short years, the Company also acquired premises in the midlands to secure the casting, polishing and plating processes, and also a production facility to allow the launch of our own Sanitary ware range.

Today, Perrin & Rowe is the largest independent manufacturer of authentic kitchen and bathroom products in Great Britain, employing over 140 people. We have redefined the market needs for classically British decorative brassware and managed to keep skilled manufacturing jobs here in the UK.

With factories in Tamworth, Rainham and Wolverhampton, all Perrin & Rowe products are manufactured from raw materials by our skilled team of engineers. With an ongoing commitment to preserving skillsets, we offer a number of apprenticeship schemes with an emphasis on teaching participants the engineering skills required to manufacture the high quality products offered by Perrin & Rowe.

PERRIN & ROWE TODAY

THE FUSION OF FUNCTION AND BEAUTY; DURABILITY AND DESIRABILITY

The strength of the Perrin & Rowe brand is built upon a clear understanding of the requirements in the luxury sector: product reliability, durability, quality and real value for money. Renowned for our unrivalled quality and an exacting attention to detail, our wide and varied product portfolio includes kitchen taps, bath and basin brassware, bathroom accessories and bathroom chinaware, all designed and manufactured in our own UK factories.

Perrin & Rowe products are outstanding examples of design excellence combined with cutting edge precision engineering. Our products are not mass produced; instead we concentrate on perfecting each individual product by controlling each process to our own exacting standards.

Our reward - Perrin & Rowe products have consistently been specified and installed in the most stunning and luxurious hotels, resorts, spas and private residences around the world.

THE PERRIN & ROWE PROMISE

All products are manufactured in the UK from the highest quality raw materials available.

Inspired by innovation and driven by engineering excellence.

Manufactured employing the latest available technology.

Plated to a thickness that exceeds the industry standards. This additional plating will ensure a deep, protective coating that is resistant to wear and tear as well as pleasing to the eye.

Assembled by hand and individually water tested to ensure peace of mind.

Made to include bearing rings and engineering 'O' seals on handles and spouts to ensure maximum durability. This feature prolongs the service life of the product and gives Perrin & Rowe products a stable "Wobble free feel".

Containing ceramic disc valves supplied by the world's leading ceramic valve manufacturer. Valves are repeatedly tested up to 500,000 life cycles, (turned on and off with pressurised water), this equates to at least 25 years of use in a domestic installation.

Specifically manufactured for each market. No additional adapters or converters are required for installation.

THE FILTRATION COLLECTION

THE FILTRATION COLLECTION

ALL SYSTEMS FLOW

Although The Perrin & Rowe Filtration collection may be a new arrival in the filtration market, the technology behind our product derives from the world's first three way tap, delivering not only hot and cold water but also filtered water through a dedicated waterway. A system that ensures the filtered water is not cross-contaminated by the standard mains hot and cold water. It incorporates the highest standard Swiss made ceramic filter which significantly reduces harmful substances such as chemical and biological contaminants as well as the most heavy metals and particles as small as 0.2 microns, while leaving untouched beneficial minerals such as fluoride, magnesium and calcium.

"ALL THE STYLE AND QUALITY YOU WOULD EXPECT FROM
PERRIN & ROWE BUT WITH THE ADDED LUXURY OF FILTERED
DRINKING WATER?"

STEVE COLE - MANAGING DIRECTOR - PERRIN & ROWE

ABOVE

PHOENICIAN 1460
SINK MIXER WITH FILTRATION AND PORCELAIN LEVER HANDLES

FOUR STAGE FILTRATION

COMPOSITION

The Ceramic filter incorporated in the Filtration system is one of the highest performing filters available in the market today and is made by Swiss manufacturer Katadyn. The cartridge is made from sintered diatomaceous earth and has a micro porous structure impregnated with silver which is known for its antibacterial action. The porous structure is able to eliminate particles down to 0.2 micron (0.0002mm) in size. One pound of carbon contains a surface area of roughly 125 acres and can absorb literally thousands of different chemicals. Activated carbon is carbon which has a slight electro-positive charge added to it, making it even more effective in eliminating chemicals and impurities. As the water passes over the positively charged carbon surface, the negative ions of the contaminants are drawn to the surface of the carbon granules.

UNIQUE FOUR STAGE FILTRATION TECHNOLOGY IS RIGOROUSLY TESTED AND DEVELOPED

Diatomaceous Ceramic: Suspended matter and bacteria are retained on the ceramic surface without the use of chemicals

Anti-Bacterial Silver: The ceramic permanently incorporates Katadyn silver that works against bacteria growth in the filter

Carbon Block Core: Absorbs chlorine, harmful chemicals and organic contaminants that contribute to bad taste and odour

Zeolite: Has the capability to remove heavy metals such as lead and mercury

THE CARTRIDGE SIGNIFICANTLY REDUCES THE FOLLOWING SUBSTANCES:

- Odour and bad taste
- Chlorine
- Organic components such as animal and human waste
- Bacteria such as E.Coli
- Protozoan cysts such as Giardia and Cryptosporidium
- Pesticides and herbicides
- Solvents
- Benzene
- Radon
- Turbidity
- Heavy metals such as Lead

THE FILTER DOES **NOT** ELIMINATE IMPORTANT MINERALS SUCH AS MAGNESIUM, CALCIUM AND FLUORIDE

TRADITIONAL HAND RINSE
EASY TO USE AND CONVENIENT - MAKES FOOD PREPARATION A BREEZE

Available for most Perrin & Rowe kitchen taps, the hand rinse makes a tap a multi-purpose workstation. Easy to use and versatile, the rinses can be positioned to the left or the right of the sink. They have insulated handles and a flexible hose (standard length 120cm) ensuring safety and convenience. Hot, cold or mixed water is diverted to the rinse once the button is pressed.

Perrin & Rowe hand rinses have been specially designed to cope with even low water pressures; the integration of a patented diverter means that they can be effective with just 1 bar (15psi) of pressure. Perrin & Rowe hand rinses are available in five different designs to complement each collection. A full range of finishes are also available.

Please note: rinses must not be connected directly to the mains supply of cold water and that the maximum recommended pressure is 5 bar (75psi). Taps selected with rinses will have single-flow aerated spouts.

ALL PRODUCTS

BI-FLOW SPOUTS

Products with bi-flow spouts are ideally suited to installations with differing hot and cold supply pressures, especially where the hot supply is gravity fed.

If your installation has equal pressures then you may prefer a single flow spout, all of our bi-flow products are available as a single flow, just prefix the product code with the letter A.

Minimum recommended installation pressure = 0.2bar.

SINGLE FLOW SPOUTS

Single flow spouts are ideally installed in systems with equal pressures. Spouts are fitted with an aerator, providing the uniform 'Champagne style' flow as standard. Minimum recommended installation pressure = 1bar.

A flow straightener is also available on request.

REGULATED SPOUTS

If you have high pressures or are concerned about water consumption then you may wish to regulate the flow. All of our products are available with regulated single flow spouts just prefix the product code with AR.

Minimum recommended installation pressure = 2bar.

THE SINK COLLECTION

THE SINK COLLECTION

THE WORLD'S FINEST FIRECLAY SINKS, HANDMADE IN THE UK

Each Perrin & Rowe fireclay sink is lovingly created by Shaws of Darwen using time honoured traditional methods and materials, bearing testament to the craftsmen who produce them.

Perrin & Rowe sinks demonstrate the natural characteristics of fireclay ceramics and are created by a 'slipcasting' process. A mixture of clay and water is poured by hand into a porous mould. When the newly formed sinks are dry enough, craftsmen remove them from their moulds before hand finishing the sinks through a process of sponging and fettling to create a smooth finish. Following a gradual drying period of up to 40 hours, the sinks are then prepared with a ground coat before being glazed. Firing in specially designed kilns at temperatures of up to 1200 degrees centigrade completes this rigorous process.

Whilst modern technology has improved manufacturing methods over the years, the principles of this handcrafted product remain the same. Traditional craftsmanship is as important now as it's always been.

THE BATHROOM COLLECTION

DISCOVER

Exclusively designed and engineered to a high standard in the UK, the Perrin & Rowe Bathroom Collection is a portfolio of the finest Traditional and Contemporary bath, basin and bidet taps, showers, chinaware and accessories available today.

A preferred brand of discerning architects and designers, Perrin & Rowe Bathroom brassware has earned specification in some of the world's most luxurious hotels, resorts, spas and private residences. Most recently, these have included Sandy Lane, Barbados, the Savoy Group, London, Celtic Manor, Wales, Huka Lodge, New Zealand and Sofitel Group.

A vast range of options are available within each Perrin & Rowe Collection; items such as rainbars and body sprays can truly enhance the showering experience. Offering a personal touch, fittings can be finished in chrome, nickel, pewter and gold.

STANDARDS & QUALITY

ACCREDITATIONS

United Registrar of Systems Cert No. 2586

For your reassurance, every piece of Perrin & Rowe brassware is engineered from approved materials to exacting standards and hand-assembled within an ISO 9001:2008 accredited, quality assured environment. Recognised all over the world for its stringent, detailed standards and attention to processes ISO 9001:2008 approval is a true mark of international quality.

Perrin & Rowe believes in upholding the international standards required wherever its products are sold. Our international approvals include WRAS, KIWA UK, UPC, NSF and the Australian Watermark Standard.

All of our products are designed to comply with the requirements of the Water Supply (Water Fittings) Regulations 1999 for England and Wales, the Water Byelaws 2000, Scotland and the Water Regulations Northern Ireland.

Many have been independently tested and verified by either Kiwa UK or WRAS, to check a specific product, or for all current listed products please contact us.

Should you have any concerns or queries about your Perrin & Rowe brassware, we will be only too pleased to help. We operate a dedicated aftersales and technical advisory service, so if you have a question, just ask us.

TCL Manufacturing Ltd operates a programme of continuous product design, development and improvement. As such, TCL Manufacturing Ltd reserves the right to change and update its products without notice. Whilst we have made every attempt throughout this brochure to use imagery that is faithful to product form and finish, variations resulting from photographic lighting, print and reproduction cannot be avoided.
